

FIFTY YEARS OF THE UIS - 1965-2015

Author: *José Ayrton Labegalini (Brazil), electrical and civil engineer, speleologist and past President of the International Union of Speleology.*

Description:

Until this book was published, the history of the UIS was spread out in the minutes of meetings and General Assemblies, various UIS publications, and the proceedings of its International Congresses. Moreover, much of it was never written and was available only from the memories of past presidents, secretaries and other members of the UIS Bureau.

In this book, the author presents the purpose of the Union and summarizes all its events through the first 50 years of its existence, as well as a variety of behind-the-scenes stories about the Union, as remembered by members of previous UIS Bureaus; many of these have never before been recorded.
