## **The 11<sup>th</sup> INTERNATIONAL CONGRESS OF SPELEOLOGY**

According to the decision in Beijing 1993, the 12<sup>th</sup> International Congress of Speleology will be held in Switzerland in La-Chaud-de-Fonds. It will be held on August 10 to 17, 1997 and it will include several special events as the multimedia festival SPELEMEDIA on August 6 to 10, 1997. Some special conferences, like as 6<sup>th</sup> Conference on Limestone Hydrology and Fissured Aquifers, symposia and workshops will be held, as well as the pre- and post-Congress excursions and camps. Just after the post-Congress activities, the 4<sup>th</sup> International Conference on Geomorphology will start in Postojna, Slovenia by specialised meeting on the Classical Karst.

The Congress will be hosted by very pleasant location, the city of La-Chaud-de-Fonds in Swiss Jura, close to the city of Neuchâtel. La-Chaud-de-Fonds is one of the centers of Swiss watchmaking industry, the city constructed on plans prepared by famous architect Le Corbusier. We suppose this site an the ideal for our Congress with nearly equal distances from the whole Europe and close to main European airports. The pleasant atmosphere of the city together with broad scale of entertainment possibilities, partly prepared specially for the Congress participants, will frame the scientific and bureaucratic sessions of our basic event. The information on the Congress prepared by its organizers you can kindly find inside this volume of the UIS Bulletin. It contains basic data, information on general program and on fees. Do not hesitate and fill the registration forms! Do not miss this event!

Two sessions of the Assembly General of the International Union of Speleology will be held at the beginning and the end of the 12<sup>th</sup> International Congress of Speleology. Inside the Bulletin, the General Secretariat gives important information concerning the preparation of the Assembly General of the UIS. We are presenting the information in advance as compared with last Congresses for the better information of national delegates and of all it may concern, and also for the reasons to keep certain dead-lines for the delivery of materials. Concerning the General Assembly, inside this volume there are published some materials prepared by the last UIS Bureau meeting in 1995 (minutes are included here, too). Those materials - i.e. proposals of the UIS Code of Ethics, the system of the UIS Awards, and improvements of the UIS Statute - are directed by this way to the critical discussion and commentary by broad speleological public before they will be presented for the authorization and vote procedure in 1997. All comments and proposals are welcome.

# **Preparation of the General Assembly of the Union**

## **Preparation de l'Assemblée Générale de l'Union**

### **DELEGUES - DELEGATES - DELEGIERTE**

#### **Important note**

The national delegate and his substitute representing the member country in the UIS, have to declare his validity by the official letter declaring that he is the representant of all speleologists of the country. When more than two speleological organizations (i.e. federations, unions, societies, associations) are existing, all have to declare that the national delegate was democratically elected.

**F** Les pays-membres dont les spéléologies ou l'organisation spéléologique sur le plan national autorisée f repréenter l'ensemble des spéléologies ont décidé d'effectuer leur droit de vote dans l'Assemblée Générale de l'Union Internationale de Spéléologie par un nouveau délégué, sont priés de faire parvenir une information par écrite au Secrétaire Générale jusqu'au 15 Juin 1997 le plus tard.

**E** If the speleologists or the national representative organisation of speleologists in any member-country have decided to give the authorization for voting in the General Assembly of the International Union of Speleology to a new delegate, it is necessary to inform the Secretary General of the UIS by letter at least before June 15, 1997.

**D** Jene Mitgliedsländer, in denen die Speläologen oder die zur Vertretung der Gesamtheit der Speläologen berufene nationale Organisation beschlossen haben, die Ausübung des Stimmrechtes bei der Generalversammlung der Internationaler Union für Speläologie durch die neue Delegierte vornehmen zu lassen, werden gebeten, das Generalsekretär der Union bis spätestens 1. Juni 1997 darüber zu informieren.

### **DROIT DE VOTE - RIGHT OF VOTES - STIMMRECHT**

**F** A l'Assemblée Générale chaque pays-membre dispose d'une voix. Le droit de vote est lié au membre titulaire (délégué) ou au membre suppléant du pays respectif. Selon les décisions des Assemblées Générales, il oblige en cas d'une absence de tous les deux personnes à l'Assemblée aux pays-membres d'autoriser un "délégué votant" avant le commencement de l'Assemblée par lettre. Ces lettres peuvent être adressées au Secrétaire Générale de l'Union avant le 15 juin 1997.

Selon les décisions des Assemblées Générales précédentes (Bowling Green 1981), les pays-membres qui sont en retard avec le paiement des cotisations annuelles à l'UIS plus que trois ans perdent le droit de voter; si le retard atteint plus que cinq ans, le pays respectif ne compte plus comme membre de l'UIS. Le Président de l'UIS prie donc de régler en cas de nécessité la question des cotisations aussi tôt que possible.

Les sommes des cotisations annuelles sont publiées dans chaque des derniers numéros de l'UIS-Bulletin.

**E** Each member-country has one vote on the General Assembly. The right to vote is given to the official delegate or to his substitute. If the two persons are absent, it is necessary - in accordance with the decision of the General Assembly in the past - for the member-country to nominate a "voting delegate" by the letter before the beginning of the General Assembly. This letter have to be sent to the UIS Secretary General before June 15, 1997.

According to past decision of the General Assembly (Bowling Green 1981), the member-country with a delay of more than 3 years in the payment of the annual contributions do not have the right to vote. If the annual contribution has not been paid more than 5 years, the country will not be included longer in the membership list. All member-countries are invited - if necessary - to contact the President as soon as possible in questions concerning the payment.

In last number of the UIS-Bulletin, the amount of annual contributions has been published regularly.

**D** In der Generalversammlung der UIS verfügt jedes Mitgliedsland über eine Stimme. Das Stimmrecht ist von Delegierten oder seinem Stellvertreter auszuüben. Wenn beide Personen bei der Generalversammlung abwesend sind, kann das Mitgliedsland jemanden anderen zur Stimmabgabe als "stimmberechtigten Delegierten" ermächtigen. Diese

Ermächtigung muß aber vor dem Beginn der Generalversammlung schriftlich vorliegen. Im voraus vorgenommenen Ermächtigungen müssen beim Generalsekretär der UIS vor dem 15. Juni 1997 eintreffen.

Nach den Beschlüssen früherer Generalversammlungen (Bowling Green 1981) haben Mitgliedsländer, die mit ihren jährlichen Mitgliedsbeiträgen an die UIS mehr als drei Jahre im Rückstand sind, kein Stimmrecht mehr. Länder mit einem Zahlungsrückstand von mehr als fünf Jahren werden in der Mitgliederliste nicht mehr geführt. Der Präsident der UIS bittet, falls derartige Rückstände bestehen, zur Regelung der Beitragsfrage mit ihm baldmöglichst Kontakt aufzunehmen.

Die Höhe der jährlichen Beiträge der Mitgliedsländer an die UIS ist in den letzten Nummern des UIS-Bulletin jeweils veröffentlicht worden.

#### NOUVEAUX MEMBRES - MEMBERSHIP DEMANDS - NEUE MITGLIEDER

**F** Des demandes de devenir membre de l'UIS doivent être parvenues au Secrétaire Générale de l'UIS avant l'ouverture du prochain Congrès Internationale de Spéléologie, en cas exceptionnel encore pendant le Congrès, mais avant la deuxième partie de l'Assemblée. Des nouveaux membres doivent dénommer immédiatement leur délégué et participent de ce moment aux votes et aux élections.

**E** Demand for membership are possible before the opening of the International Congress of Speleology by an information to the Secretary General of the UIS, eventually also during the Congress, but before the opening of the second part of the General Assembly. The demands are to be accepted by the voting delegates of the member-countries during the General Assembly. New members have to nominate immediately the official delegate and participate also on votes and elections.

**D** Anträge auf Mitgliedschaft bei der Union sind nach Möglichkeit von Beginn des kommenden Internationaler Kongresses für Speläologie dem Generalsekretär der IUS schriftlich zu übermitteln, können aber in Ausnahmsfällen auch noch während des Kongresses, jedoch vor Beginn des zweiten Teiles der Generalversammlung eingebracht werden. Über die Aufnahme neuer Mitglieder entscheidet die Generalversammlung. Neue Mitglieder haben unverzüglich ihren Delegierten nahmhaft zu machen und nehmen sofort nach der Annahme ihres Aufnahmeantrages an allen Abstimmungen und Wahlen teilnen.

#### CANDIDATURES POUR LE PROCHAIN CONGRÈS - PROPOSALS FOR THE NEXT CONGRESS - KANDIDATUREN FÜR DEN NÄCHTEN KONGRESS

**F** Des candidatures pour le 13<sup>e</sup> Congrès International de Spéléologie qui doit être réalisé en 2001, doivent être présentées pendant la première séance de l'Assemblée Générale de l'UIS à La-Chaud-de-Fonds en août 1997. Un représentant de chaque pays qui est candidat aura la chance de donner un résumé concernant le programme prévu et les régions visitées pendant les excursions. Les délégués de pays-membres peuvent, avant de voter à la fin du Congrès, discuter leur choix pendant le Congrès avec les autres participants de leur pays; en cas de nécessité l'utilisation d'une salle de réunion soit assurée par les organisateurs du Congrès. Selon les décisions précédentes en cas que l'Assemblée Générale accepte une invitation d'un pays en dehors de l'Europe, une "Conférence régionale européenne de spéléologie" sera organisée soit en 2000 ou 2002. La prière d'organiser une telle conférence sera présenté à un des pays européens qui ont été candidat pour le Congrès.

**E** Candidatures of member-countries for the 13<sup>th</sup> International Congress of Speleology to be held in 2001, have to be presented no later than in the opening session of the General Assembly of the UIS in La-Chaud-de-Fonds in August, 1997. In this session, each country will have the possibility to give a short summary concerning the region foreseen for the main events of the Congress and the excursion areas. During the Congress, voting delegates can discuss the proposals with the other participants from their countries. If necessary, a meeting room for this discussion will be reserved by the General Assembly, a decision is made by vote. In the case that the 13<sup>th</sup> International Congress of Speleology will be held outside of Europe, in accordance with previous decisions an "European Regional Conference of Speleology" has to be organized in 2000 or 2002. The organiser of such Conference will be the European country which candidate for the International Congress of Speleology.

**D** Kandidaturen für den 13. Internationaler Kongress für Speläologie, der im Jahre 2001 durchzuführen ist, sind spätestens in der erste Session der Generalversammlung der Internationaler Union für Speläologie in La-Chaud-de-Fonds im August 1997 vorzulegen. Ein Vertreter jedes Landes, das sich um die Abhandlung des Kongresses bewirbt, wird Gelegenheit haben, den vorgesehenen Veranstaltungsort und die wichtigsten Exkursionsziele vorzustellen. Die Delegierten jedes Landes haben während des Kongresses Gelegenheit, ihre Entscheidung mit allen Teilnehmern aus ihrem Land zu überlegen; die Veranstalter des Kongresses werden im Bedarfsfall ein Sitzungszimmer für diesen Zweck bereitstellen. Für den Fall, dass die Wahl im zweiten Teil der Generalversammlung der IUS am Schluss des Kongresses auf ein aussereuropäisches Land fällt, nach den früheren Beschlüssen hat die Abhanltung einer "Europäischen Regionalkonferenz für Speläologie" entwerden im Jahre 2000 oder 2002 beschlossen. Um die Durchführung dieser Veranstaltung soll ein Land ersucht werden, das selbst Kandidat für den nächsten Internationaler Kongress gewesen ist.

#### COMMISSIONS, GROUPES DE TRAVAIL ET COMITÉS COMMISSION, WORKING GROUPS AND COMMITTEES - KOMMISSIONEN UND ARBEITSGRUPPEN

**F** Les Présidents des Commissions, Comités et des Groupes de Travail ont été invité d'envoyer au Secrétaire Général de l'UIS un rapport concernant l'activité de leur groupement respectif depuis le dernier Congrès Internationale de Spéléologie le 31 janvier 1997 le plus tard. Jusqu'à cette date, on attend aussi des propositions concernantes les travaux proposés pour le futur.

Il est prévu de publier l'ensemble de ces rapports dans un numéro spécial de l'UIS Bulletin avant le prochain Congrès et de distribuer ce numéro aux participants de l'Assemblée Générale de l'UIS à La-Chaud-de-Fonds.

Pendant le 12<sup>ème</sup> Congrès Internationale de Spéléologie, des séances de tous les Commissions de l'UIS sont prévues.

**E** The Presidents of Commissions, Committees and Working Groups are invited to send the report concerning the activities during the last period of work and the intentions for the forthcoming four-years-period to the Secretary General of the UIS before January 31, 1997.

It is foreseen to publish all reports in a special number of the UIS Bulletin before the 12<sup>th</sup> International Congress of Speleology and to distribute this number to the participants of the General Assembly of the UIS in La-Chaud-de-Fonds. Sessions of all Commissions are foreseen during this Congress.

**D** Die Vorsitzenden der Kommissionen und Arbeitsgruppen der UIS wurden eingeladen, dem Generalsekretär der UIS bis zum 31. Januar 1997 einen Tätigkeitsbericht über die zu Ende gehenden Arbeitperiode zu übermitteln, sowie Vorschläge über die zukünftige Zielsetzung zu erstatten.

Die Berichte sollen vor der Generalversammlung der UIS im August 1997 in einem Heft des UIS Bulletin zusammengefasst und dort vorgelegt werden.

Während des 12. Internationaler Kongresses für Speläologie sind zwar Sitzungen aller Kommissionen vorgesehen.

#### AGENDA OF THE ASSEMBLY GENERAL

The detailed version of agenda will be presented in the UIS Bulletin 1997/2 before the Congress.

## The UIS Life

### The regular session of the UIS Bureau

The 3<sup>rd</sup> regular session of the Bureau of the International Speleological Union was held in Breitenbach, Switzerland on October 4-6, 1995 on the occasion of the 10<sup>th</sup> National Speleological Congress.

The session started by the control of the agenda from Jedovnice, 1994. It was stated, that the preparation of the information brochure on the UIS have to continue owing to the complexity of the problem. The sportive and scientific activities should be pointed out separately. The distribution of the internal responsibility to Secretaries Adjoint will be the obligatory task of the new UIS Bureau. Contacts with Namibia were established, there is no official speleological organization, therefore its annual contributions are frozen. Contacts were established with Bolivia, annual fees will be covered during 12<sup>th</sup> International Congress of Speleology. The Bureau adopted the resolution that both dead and living persons will be included into the List of Honours. According to the rules accepted and after the proposals of the national delegates and Commission/Working Group Presidents, the list will be prepared in the next UIS Bureau Session. The idea of direct financial sponsoring of expeditions which appeared in last Bureau Session was fully rejected.

**The UIS finances.** On October 3, 1995, the UIS has 5702.79 USD deposited on its account in Prague, 65 000 ATS on bank book in Vienna and 2683.30 CZK cash by the Secretary General. Costa Rica promised to pay annual contributions for 1994-1997 during the 12<sup>th</sup> International Congress of Speleology in Switzerland 1997.

**The Code of Ethics** was prepared, based on version of Labegalini and Forti, completed by James. The Bureau adopted the resolution that the proposal of the Code of ethics is approved and recommended for the authorization during the Assembly General (see the text in this volume).

**The UIS Awards.** The system of the UIS Awards was proposed. Awards can be supported by a total sum of 1.000 USD. The Bureau adopted the resolution that the proposal of the system of the UIS Awards is approved and recommended for the authorization during the Assembly General (see the text in this volume).

**The agreement with the International Geographical Union was proposed by the IGU.** After the long discussion, it resulted that such agreement will have general political profit for the UIS and will enable to closely cooperate on the edition of the BBS Abstracts which could have broader market. The Bureau adopted the resolution that the improved proposal of the agreement is approved and recommended for the voting procedure during the Assembly General and to deliver it to the IGU (see the text in this volume).

**UIS Commissions.** According to the elections by the correspondence, Prof. Dr. Stein-Erik Lauritzen (Bergen, Norway) is confirmed the Acting President of the *UIS Commission on Paleokarst and Speleochronology*. Dr. Carol Hill asked the Bureau to establish the *UIS Working Group on Cave Mineralogy* to standardize new names of cave minerals. As the establishment of the WG is supposed only for 1997, the idea was accepted with thanks. The establishment will be one point of the Assembly General 1997. The Hungarian proposal to establish the *UIS Commission - the League of towns above caves* has a strong support of the UIS Bureau. Nevertheless, the proposal lacks some of major information and also the idea to focus main problems of management of towns (settlements, villages) in the karst is limited only to some problems and fits rather to the rank of nongovernmental organization. The UIS supports the idea of establishing of such NGO and will help it by consultations and active participation. If there is the will, the UIS Bureau is proposing to Hungarians to establish the *UIS Working Group on the Urbanization of Karst*. There appeared the information of the *UIS Commission on Informatics* on the character of its system of storage of information (WWW) and the information of Klimchouk on *UIS Servers* which are set up (for actual information, rapid data exchange, cannot store the data, only to distribute). Y. Shopov (the UIS Commission on Physico-Chemistry and Hydrogeology of Karst) delivered to all UIS Bureau Members the *Proposal for improvement of the scientific work of UIS by formation of UIS Scientific Steering Committee*. The UIS Bureau mentions that the material maybe can represent good idea but the form is in not acceptable look, it introduces the mechanism of parallelism and contributes to further deeper separation of cavers and scientists. As the UIS Bureau chosen other rules (e.g. during the 1994 Session), the material was rejected. During the discussion, there appeared the proposal to insert the definition of the UIS Permanent Commissions and the UIS Temporary (ad hoc) Commissions into the UIS Statut.

**Improvements of the UIS Statut.** As the present valid text of the UIS Statut was confirmed in 1964 and completed in some paragraphs in 1969 (Stuttgart), 1977 (Sheffield) and 1981 (Bowling Green), the necessity to complete it arose according to demands of speleological and karst institutions, UIS member countries and individuals. The whole text of the valid Statut was thoroughly discussed comparing the French version with the German and

Russian translations. Both translations are somewhat changing the sense of the French version, the Russian version is very imperfect. There were several basic problems to be discussed and solved, i.e. the problem of the institutional membership (affiliated institutions), definition of Commissions and Working Groups, and the statut of the UIS Bureau. After the discussion, the UIS Bureau members decided to improve the UIS Statut to reflect present situation in the international speleology. Nevertheless, the improvements are not changing the general sense and basic ideas of the original text.

*Affiliated institutions.* It was mentioned, that such bodies cannot be named members. It was proposed to use the term - affiliated institution. It means that the designation of such form of "membership" cannot be against the sense of the UIS Statute, therefore the UIS Statute have to be improved. The UIS Bureau adopted the resolution - the UIS Bureau agrees with the implementation of the *affiliated members* into the structure of the UIS Statut. Such bodies will have no voting rights during the Assemblies General. The height of annual contributions and other practical consequences will be prepared during the 1996 Session in the form for the voting procedure during the Assembly General 1997. The *UIS Bureau Statute*: the statute of the UIS Bureau should be changed to the *Executive Bureau* with the executive power for better, clear and more rapid decisions in the effective and fast way. The UIS Bureau should have possibility to establish, cancel or freeze e.g. the Commissions or Working Groups. The General Assembly can cancel all decisions of the UIS Bureau, but with the validity only after the date of the cancellation by the Assembly General (to exclude back validity of such General Assembly resolution).

*UIS Commissions* should be divided into the *UIS Permanent Commissions* and to the *UIS Temporary* (or *ad hoc*) *Commissions*. The Temporary Commission will be established for the solution of well-defined project with clear output (results) and they will be time-limited in their life. The change of the Temporary Commission to Permanent Commission have to be confirmed by the Assembly General. The Permanent Commission will be established for the field of permanent interest in speleology and within the UIS. Such Commissions have to be confirmed by the Assembly General. *Working Groups* will be established by the UIS Bureau, their change to the Permanent Commission have to be confirmed by the Assembly General. The Assembly General will approve the activity of Commissions, Working Groups and Committees. The *UIS Committees* are non-scientific equivalents of the Commissions (e.g. Advisory Committee).

All other minor improvements are included in the proposal of the improved version of the UIS Statut (see this volume), where the French text of valid UIS Statute is completed in new improvements and old inserts from Sheffield and Bowling Green are incorporated into the French text.

**Request of support of the Chinese project.** The Chinese Institute of Geography (Academia Sinica) asked the UIS Bureau to support the idea to include the *Stone Forrest of Yunnan* (Lunan County) into the *UNESCO World Heritage List*. The UIS Bureau adopted the resolution, that the UIS Bureau strongly supports the idea and will support the proposal by the recommendation letter to UNESCO.

**Cooperation with the Speleological Federation of the European Union.** The Bureau was informed on prepared changes of the SFEU Statut which should be discussed during the 1995 SFEU Assembly General in Ireland. The idea of the change is that the SFEU will be the constituent of the UIS. If the proposal is accepted, than the UIS and the SFEU should discuss the problem of the hierachic incorporation into both Statutes.

**Relations with UNESCO.** As the relations with UNESCO are limited owing to the problem of time demand, personnel and the UIS statute in the category B, the UIS Bureau started to prepare the specialized *Committee* or *Commission for the UNESCO* which will be based on the group of people who are able and experienced with international bodies. It was stated, that within the structure numerous professional associations (i.e. NGO's associated with the UNESCO like as IAH, IGU, IAG, etc.), there are bodies (karst commissions) dealing with karst which are changing their activity in direction of the UIS work and interests. It should be useful to cooperate with them and to try to delegate all karst problems to the UIS.

**Resolutions of the Bureau meeting:**

- both dead and living persons will be included into the List of Honors
- the proposal of the Code of ethics is approved and recommended for the authorization during the Assembly General
- the proposal of the system of the UIS Awards is approved and recommended for the authorization during the Assembly General
- the improved proposal of the agreement with the IGU is approved and recommended for the voting procedure during the Assembly General and to deliver it to the IGU
- the improved UIS Statute was approved and prepared for the discussion

- the UIS Bureau strongly supports the idea to insert Yunnan Stone Forrest into the UNESCO World Heritage List and will support the proposal by the recommendation letter to UNESCO

*Next UIS Bureau Session* will be held on August 5 to 6, 1996 on the occasion of the NSS Convention, Salida, Colorado, USA.

## **UIS Code of Ethics for Cave Exploration and Science in Foreign Countries**

UIS support the international activities of speleological societies, caving groups and karst scientists because they are important for; discovering new caves and extending old caves; investigating their contents, for example, minerals, biota and archaeological and anthropological remains; distributing knowledge of karst and caves throughout the world; enabling the exchange of safe caving practices and assisting in the protection and preservation of caves and karst.

To avoid misunderstanding by indigenous and local people, government and local and national caving organisations in the country in which the proposed cave exploration or scientific investigation is to take place. The UIS Bureau has prepared the following recommendations.

### **1. Before leaving your country**

In many cases it will be necessary to obtain official permission from the authorities in the country being visited. In addition, inform the national speleological organisation of the country to be visited, if there is no national organisation contact the UIS national delegate.

If possible organise joint expeditions with cavers from the country to be visited. The national speleological organisations will be familiar with the official requirements for visiting expeditions. They will be well-versed with the requirements for the lodging of expedition reports and other published material and the regulations pertaining to the removal of materials by the expedition from the caves and to other countries for scientific studies.

### **2. During expedition**

The expedition members should respect the laws of the country and local traditions and understand that some caves may be sacred sites and be of religion and/or cultural significance; exploration and research studies in these caves may be restricted.

The expedition members should not damage either the karst or its caves. They should be possible educate and advise local communities in the protection and preservation of their karst and caves.

### **3. After the expedition**

Samples from the caves and karst collected by the expedition should only be taken out the cave and country if the correct export procedures are followed and their export is permitted.

Copies of all printed material produced by the expedition, together with the location and maps of the caves should be sent to the participating caving clubs and the national speleological organisation and/or the UIS national delegate. Assistance received from the organisations within the country visited should be acknowledged in all the expedition publications.

## **Inaugural UIS Prizes**

To be awarded at the 12<sup>th</sup> International Congress of Speleology in La Chaud-de-Fonds, Switzerland, August 1997.

### *1. UIS prize for the most significant discovery May 1993 - May 1997 (USD 250)*

Nominations for this prize are to be sent to the chair of the UIS Prizes Committee prior to May 1997. Late submissions can be made at the 12<sup>th</sup> International Congress of Speleology, La Chaud-de-Fonds, Switzerland. The UIS Bureau reserves the right to nominate additional discoveries for this prize.

### *2. The UIS prize for the most significant publication on a cave or karst topic published in 1993-1997 (inclusive) (USD*

250)

Nominations for this prize should be sent to either the chair of the UIS Prizes Committee or to the Secretary General. From the nominations a short list will be prepared. Copies of the short-listed publications may be required for final judgement and display at the 12<sup>th</sup> International Congress of Speleology, La Chaud-de-Fonds, Switzerland.

### 3. *UIS poster prize (USD 250)*

This prize for the best poster display at 12<sup>th</sup> International Congress of Speleology, La Chaud-de-Fonds, Switzerland. The poster can be on any cave or karst topic. However, entries in the cave photographic and surveying competitions are inegible for this prize.

The UIS prizes will be judged by a panel of international experts chaired by the senior Vice-President of UIS, Dr. Julia M. James. The prize together with a certificate will be awarded during the closing session at the 12<sup>th</sup> International Congress of Speleology, La Chaud-de-Fonds, Switzerland.

## **Agreement with IGU** (the proposal)

The International Geographical Union (IGU) and the International Union of Speleology (UIS) have reached an agreement to improve scientific cooperation

The International Union of Speleology agrees to the proposed affiliation with the International Geographical Union.

The International Geographical Union agrees to the proposed affiliation with the International Union of Speleology.

The International Speleological Union regards this affiliation as an acknowledgement of the important role of the International Geographical Union in the development of geographical and environmental sciences, and as a method of close cooperation.

The International Geographical Union regards this affiliation as an acknowledgement of the significant contribution of the International Union of Speleology to the exploration, documentation, and research activity in regions and environments with underground cavities, and particularly in the karst areas.

Neither Unions intends this affiliation to imply mutual subordination.

Agreement has been reached on the following:

(1) The International Geographical Union wants to improve speleological and karstological research, encouraging physical geographers to constitute a Commission working on karst environments ("Karst Commission") in cooperation with the International Union of Speleology.

(2) One contact person will be nominated by the Executive Committee (Bureau) of each Union. These contact persons will, ex officio, become members of the IGU commission dealing with karst, and of one the UIS scientific commissions. They may be invited to attend the meetings of Executive Committee (Bureau) meetings of both Unions as non-voting members whenever matters of common interest are on the agenda.

(3) The Karst Commission of the International Geographical Union and scientific commission of the International Union of Speleology will exchange newsletters.

(4) The commissions of the International Geographical Union and the International Union of Speleology will endeavour to organise joint meetings in order to avoid duplication of expense and effort.

(5) One year before the congresses of the International Geographical Union, the International Union of Speleology will give its recommendations for the Karst Commission's programme for the following four years to the President and Executive Committee of the International Geographical Union.

(6) One year before the congresses of the International Union of Speleology, the International Geographical Union will give its suggestions for the UIS scientific commissions' programme for the following four years to the President and Bureau of the International Union of Speleology.

(7) The International Union of Geography and the International Union of Speleology will collaborate closely for a stronger involvement in, and representation on, all international programmes about conservation of natural environment, resources, cultural heritage and global change with reference to the karst areas, especially within the

International Council of Scientific Unions and all other governmental and non-governmental organisations.

(8) During the 1996 Congress of the International Geographical Union in the Netherlands the IGU Karst Commission will endeavour to organise its meeting in cooperation with the International Union of Speleology. Similarly, during the 1997 Congress of the International Union of Speleology in Switzerland the UIS scientific commissions will endeavour to organise joint meetings with the IGU Karst Commission.

This agreement of affiliation between the two Unions is regarded as temporary by both Executive Committees (Bureaus). It will become permanent if ratified by the General Assemblies of both Unions, i.e. at the 1996 IGU Congress and 1997 UIS Congress.

## **Statuts de l'Union Internationale de Spéléologie**

(proposal of improvements)

Here enclosed, you can find the proposal of all improvements of the UIS Statut adopted by the UIS Bureau meeting in October 1996. The text is available for detailed discussion by member countries, national delegates, UIS Commissions, Working Groups and Committees. All comments are welcome by the Secretary General.

All new inserts, grammatical and other corrections and all changes to the Statut are expressed in *italics*. Changes adopted in Sheffield and up to now listed at the end of the Statut as "Decisions of General Assemblies in addition to the Statutes" are inserted translated to the French text and expressed in underlined normal types.

**To the discussion, there are devoted inserts and changes expressed in italics (except of grammatical corrections). According to the Article 6 of the valid Statut, all comments and proposals have to be delivered to the UIS Bureau (i.e. to the Secretary General) not later than 4 months before the start of the International Congress of Speleology. Nevertheless in this case when a lot of work for the Advisory Committee is expected, we are not able to discuss any of proposals for substantial changes after February 10, 1997!! Thank you.**

### **Article 1: But**

L'Union Internationale de Spéléologie a pour but le développement des relations entre spéléologies de tous les pays et la coordination de leurs activités sur le plan international.

### **Article 2: Membres de l'Union**

(a) L'Union Internationale de Spéléologie est une association des personnes (*représentants nationaux*) habilitées à représenter les spéléologues des pays (*pays-membres*) adhérents à l'Union.

(b) Il appartient aux spéléologues de chaque pays de désigner suivant la méthode qui leur paraît la meilleure deux *représentants nationale*, dont l'un est membre titulaire et l'autre membre suppléant de l'Union. *Ces représentants sont membres régulaires de l'Union.* Ces représentants doivent servir de lien entre le Bureau de l'Union et l'ensemble des spéléologues de leur pays, notamment pour les questions portant sur l'information, la documentation et le financement de l'Union.

(c) Chaque membre reste en fonction pendant la période comprise entre deux Assemblées Générales de l'Union. Chaque pays peut renouveler sa confiance à son membre titulaire et à son suppléant à la fin de leur mandat, ou peut désigner de nouvelles personnalités qui deviennent de droit les nouveaux membres titulaires et suppléants; il doit faire connaître par écrit cette désignation au Bureau de l'Union avant l'ouverture de l'Assemblée Générale.

(d) *Les institutions qui s'intéressent au développement de la spéléologie et aux activités de l'Union peuvent adhérer à l'Union en faisant une demande écrite.*

(e) *Les institutions adhérentes à l'Union désignent leur représentant pour l'Union qui est le membre adhérent et non votant de l'Union. Ce représentant maintient les contacts avec le Bureau et assure l'échange d'informations entre l'institution adhérente et le Bureau.*

### **Article 3: Bureau de l'Union**

(a) Lors de chaque Assemblée Générale, les membres titulaires (ou leurs suppléants en cas d'indisponibilité des titulaires) élisent au scrutin secret un Bureau comprenant un Président, deux Vice-Présidents, un Secrétaire Général, qui doit assumer aussi les fonctions du Trésorier, et des Secrétaires Adjoints en nombre fixé par l'Assemblée Générale.

(b) Les membres du Bureau doivent être des membres en fonction (titulaires ou suppléants) ou des personnes proposées ou recommandées par *l'Assemblée Générale*. Ils doivent tous appartenir à des pays différents.

(c) L'élection de chacun des membres du Bureau est obtenue à la majorité absolue des suffrages des membres présents au premier tour, ou à la majorité relative des suffrages des membres présents au deuxième tour. En cas d'égalité de voix au deuxième tour, *la relation de voix du premier tour est décisive, s'il est pareil, l'élection est valable aux bénéfice du candidat plus âgé.*

(d) Le Président, les Vice-Présidents et les Secrétaires Adjoints ne sont immédiatement rééligibles qu'une seule fois dans les mêmes fonctions. Le Secrétaire Général est rééligible sans limitation de durée.

(e) En cas de vacance du poste du Président, ses fonctions sont assurées par le doyen des Vice-Présidents jusqu'à l'Assemblée Générale suivante. En cas de vacance du poste de Secrétaire Général, ses fonctions seront assurées par un Secrétaire Général provisoire choisi par le Bureau.

(f) *Le Bureau de l'Union représente le comité exécutif qui livre les décisions entre les Assemblées Générales.*

### **Article 4: Assemblées Générales**

(a) L'Union se réunit en Assemblée Générale au cours de chaque Congrès International de Spéléologie et entend les rapports du Président et du Secrétaire Général. Pour les délibérations chaque pays dispose d'un seule voix.

(b) Les représentants des pays membres qui doivent leurs cotisations plus que trois ans au date de l'Assemblée Générale perdent leurs voix. Les pays-membres avec le retard plus long que cinq ans seront exclus de la liste des membres de l'Union.

(c) Au cours de son Assemblée Générale, l'Union choisit à la majorité relative des membres titulaires (ou suppléants) présents, parmi les diverses candidatures, le pays chargé d'organiser le Congrès International suivant. En cas d'absence de candidature au cours d'un Congrès, ou en cas de renoncement du pays choisi, le Bureau de l'Union provoque de nouvelles candidatures et procède à une consultation de la totalité de ses membres par correspondance; le choix est alors fait à la majorité relative des votes reçus dans les délais précisés par le Bureau.

(d) Sur demande de son Bureau, ou à la requête d'au moins dix pour cent des membres de l'Union adressées

au Bureau, l'Union peut se réunir en Assemblées Générale Extraordinaire ou procéder à des votes par correspondance pour régler au mieux tout problème important intéressant la spéléologie internationale. Ses décisions majoritaires sont sans appel.

(e) L'Assemblée Générale approuve l'activité des Commissions, Groupes de travail et Comités.

(f) L'Assemblée Générale peut donner, sur proposition du Bureau sortant, des titres honoraires aux membres sortants.

## **Article 5: Fonctionnement de l'Union**

(a) Le Bureau est responsable devant l'Assemblée Générale. Les activités du Bureau sont régies par un Règlement Intérieur en accord avec les présents Statuts. Ce règlement précise les prérogatives, les attributions et les rôles de chacun des membres du Bureau.

(b) Le Bureau décide de la création de Commissions Permanentes, Commissions Temporaires ou Groupes de travail chargées d'étudier des problèmes particuliers, et Comités non scientifiques. Ces Commissions, Groupes de travail et Comités comprennent tous les spéléologues qui désirent en faire partie. Au moment de leur constitution pendant un Congrès ou une Réunion Internationale, elles élisent un Président qui est responsable de la Commission, Groupes de travail ou Comités devant le Bureau. Ces Commissions, Groupes de travail ou Comités doivent tenir le Bureau de l'Union au courant de leur activité. Dans le cas où cette activité serait jugée insuffisante ou devenue sans objet, le Bureau peut provoquer les mesures nécessaires pour accroître ou suspendre l'activité des Commissions, Groupes de travail et Comités.

(c) Le Bureau décide de l'admission des institutions adhérentes à l'Union.

(d) Les langues officielles de l'Union sont celles des Congrès Internationaux (Français, Anglais, Allemand, Espagnol, Italien et Russe).

(e) Les moyens financiers de l'Union sont obtenus:

1. par une cotisation individuelle des participants aux Congrès Internationaux et à toute la Réunions Internationales patronnées par l'Union. Le montant de cette cotisation est fixé lors de l'Assemblée Générale et encaissé par les organisations des Congrès et Réunions en même temps que leurs droits d'inscription.
2. par des cotisations annuelles versées par les associations spéléologiques des pays adhérents à l'Union ou allouées par des institutions officielles ou privées.
3. par des cotisations annuelles versées par les institutions adhérentes à l'Union.
4. par des contributions exceptionnelles de sources diverses (institutions officielles ou privées, sociétés savantes ou commerciales, etc.), sous réserve que ces contributions n'engagent pas la position morale de l'Union.
5. par la vente de publications diverses offertes à l'Union ou réalisées sous son contrôle.
6. par tous autres dons et legs destinés à l'Union.

(f) Le Secrétaire Général-Trésorier est habilité à recevoir et à gérer, selon les directives du Bureau, toutes les ressources financières de l'Union. Il tient un comptabilité, dont il est responsable, et qui sera vérifiée, lors de l'Assemblée Générale par deux commissaires aux comptes élus par cette Assemblée parmi les représentants de pays autres que celui du Secrétaire Général-Trésorier.

## **Article 6: Commissions, Comités et Groupes de travail**

(a) *Les Commissions et Groupes de Travail (scientifique) et les Comités (non scientifique) sont dirigés par le Bureau.*

(b) La structure des *Groupes de travail*, des *Commissions* et des *Comités* de l'Union est suivante:

1. Départements qui devraient s'occuper de la protection, recherche scientifique, exploration, documentation et éducation. Le Département se compose d'une Président nommé par les Présidents des différentes *Commissions et Groupes de travail* dans ce *Département et approuvé par l'Assemblée Générale*. Le Département sera responsable d'envoyer le rapport et les propositions des *Commissions et Groupes de travail* à l'Union pour sa postérieure transmission à l'UNESCO.

2. Des *Commissions* qui seraient chargées de problèmes spécifiques et qui servent pendant quatre années, renouvelable par vote au *l'Assemblée Général* suivant.

3. *La transformation du Groupe de travail à la Commission doit être approuvée par le prochain Assemblée Générale.*

(c) Pour le fonctionnement des *Commissions* et *Groupes de travail*, le Bureau donne les recommandations suivantes:

1. L'activité des *Commissions, Comités et Groupes de travail* doit être organisé sous la forme la plus simple.

2. En général les *Commissions, Comités et Groupes de travail* ne devaient pas avoir besoin d'un vote formel pour leur fonctionnement.

3. Si un vote formel est nécessaire il serait sur la base d'un voix par pays-membre qui participe d'une forme active aux travaux de la *Commission, Comité et Groupe de travail*.

4. Si une *Commission, Comité ou Groupe de travail* désire organiser une activité dans un pays-membre, elle doit le communiquer au Secrétaire Général de l'Union pour obtenir l'accord de l'organisation spéléologique du pays en question par le délégué national officiel.

(d) *Les membres du Bureau sont ex officio les membres de toutes les Commissions, Groupes de travail et Comités sans droit de voter.*

## **Article 7: Modification des Statuts et Contestations**

(a) Tout projet de modification des Statuts de l'Union doit être soumis par écrit au Bureau de l'Union au moins 6 mois avant l'Assemblée Générale devant se tenir lors du Congrès International suivant. Ces propositions seront étudiées par une *Comité des Statuts* en même temps que celles relatives aux Congrès et soumises au jugement de l'Assemblée Générale. *Si les projets de modification importants pour la spéléologie internationale seront présentés entre les Congrès Internationaux de Spéléologie, la procédure de vote est réalisée par l'Assemblée Générale Extraordinaire ou par correspondance.*

(b) En cas de contestation sur l'interprétation des présents Statuts, le text Français fera seul foi.

## **Commissions and Working Groups**

### **Working Group "Children and Caving"**

Commission "Children and Caving" had been formed within the Ukrainian Speleological Association in 1992 and it coordinates relevant activity within the CIS countries.

Coordination of children caving activity is perhaps more important for the CIS countries as there is great number children caving groups in Russia (over 40) and Ukraine (20). Such groups also exist in Turkmenia, Bulgaria,

Czech Republic.

Activity of some groups is not confined to occasional visiting simple caves but is provided on regular basis in form of youth and children clubs or sections of adult clubs, and includes regular training, advanced vertical caving, search, exploration and survey of new caves, conservation projects, etc.)

Exchange of information and literature have been provided between most of groups.

Caving seminars and camps for young cavers were held every year (1993 and 1994 in Western Ukraine, 1995 in Crimean Mountains).

Competitions on caving technique for children were held in different countries (Russia, Turkmenia, Ukraine) in 1991-1994 and is being held in 1995 in Crimea. Young cavers from many places of Russia, Ukraine, Turkmenia, Bulgaria took part in these competitions.

Some young caving groups from Russia and Ukraine provided for joint research projects.

Conservation programs make a big part in teaching and training of young cavers. Some cave clean-up projects have been realized. American booklet for young cavers "Help Save the Caves" have been translated into Russian and sent to all our correspondents.

In 1995 large ecological children camp is organized in the Western Ukraine, with archeological research, clean-up and gating projects in Verteba Cave included to the program.

Large 12-days children caving camp is also organized in July in Crimea, Tchatyrdag Plateau, with about 130 participants from many places of Ukraine and Russia. Caving training seminar, vertical technique competitions and clean-up of some caves are included to the program.

We would like to suggest a closer information exchange and coordination between group leaders and young cavers of different countries within the UIS Commission "Children and Caving". It can be achieved by preparing every year a special newsletter to be distributed to all groups and leaders concerned. For such newsletter, we ask all groups and leaders interested to provide for the following:

1) Prepare and send us a report about activities of your group (something like traditional season letters), and/or short information and notes on interesting trips, projects, events. It is recommended that children prepare such materials themselves.

2) Send us lists and copies of different publications about children activities in caves, information about educational and training programs concerned, etc.

3) Send us information about national events for children interested in caving, in which participation of groups from other countries is welcomed.

We also suggest for discussion a possibility of organizing a children art and photograph exhibition on cave topics within the UIS Congress in Switzerland, 1997.

The first issue of the above mentioned newsletter could be released by the end of 1995.

Any other discussion of topics relevant to children activity is encouraged.

Nataly Jablokova

## **Commission on Physico-chemistry and Hydrogeology of Karst Report for 1995**

Commission is preparing 2<sup>nd</sup> completely new edition of the book "Cave Minerals of the World". Over 15 commission members are authors of different special topics and top 10 caves chapters of this book. It is complete up-to date, stat-of-the-art review of all cave mineralogy, based on papers of over 4 000 authors. The book is prepared to be interesting and useful to every caver, but have high scientific value. It is expected to be printed before next UIS Congress in Switzerland.

Recently Commission has been restructured to improve its activity. Now it has national representatives producing contacts between members and board of commission and responsible for activities of members from every country. Commission also formed number of sections on specific topics: "Cave Mineralogy", "Speleothem Research", "Cave Climate", "Karst Geology and Geomorphology", "Karst Geochemistry", "Techniques for Location of New Caves", "Hydrochemistry", "Infiltration Research", "Climatic Impact on Karst" and "Radioactivity in Caves. More sections can be formed under request of commission members.

*Luminescence of cave minerals program A:* manuscript of monograph "Luminescence of Cave Minerals" was prepared in 1993, but has not been still published, because of lack of money for printing. Search for such funds is still in progress and this book may be prepared before the next Congress.

*Working Team on Speleothem Records of Environmental Changes:*

Significant advance in speleothem records of paleoenvironments has been achieved in 1995 year. It has been demonstrated that:

1. Calcite speleothems luminescence depend exponentially upon soil temperatures that are determined primarily by solar infrared radiation in case that cave is covered only by grass or upon air temperatures in case that cave is covered by forest or bush. In the first case, microzonality of luminescence of speleothems can be used as an indirect Solar Activity (SA) index, but in the second as an paleotemperature proxy. So in dependence on the cave site we may speak about "solar sensitive" and "temperature sensitive" luminescent speleothem records like in treering records, but in our case record may depend only on temperature either on solar irradiation: In case of Cold Water cave, Iowa, US we obtained high correlation coefficient of 0.9 between the luminescence record and Solar Luminosity Sunspot index and reconstructed sunspot numbers since 1 000 AD with precision in frames of the experimental error of their measurements in case of Rats Nest cave, Alberta, Canada we measured correlation of 0.67 between luminescence intensity and air temperatures record for the last 100 years and reconstructed annual air temperatures for last 1 500 years at the cave site with precision of 0.35°C, but of the direct measurements 0.1°C. No paleoclimatic method has ever demonstrated such good precision. Intensity of luminescence was not dependent on actual precipitations and sunspot numbers (zero correlation).

2. Striking correlation (with a correlation coefficient of 0.8) was demonstrated between the calibration residue delta  $^{14}\text{C}$  record and a LLMZA speleothem record. The  $^{14}\text{C}$  record represents the Cosmic Ray Flux (CRF) and modulation of the CRF by the solar wind. Using a luminescent record from Duhlata cave, Bulgaria we obtained a reconstruction of the solar modulation of the CRF during the last 50 000 years with resolution of 28 yrs. Original luminescent record exhibited correlation of 0.78 with an independent record of variations of intensity of the geomagnetic dipole for the same time span. Observed dependencies of the geomagnetic dipole intensity on the orbital variations and solar luminosity variations correlates excellent with the established theoretical equations.

3. Speleothem growth rate variations represent rainfall variations. Speleothems luminescence visualize annual microbanding, we used to derive proxy records of annual precipitations for the cave site. In case of Rats Nest cave, Alberta, Canada we reconstructed annual precipitations for last 280 years at the cave site with precision of 80 mm/year. By comparison of luminescent records with other solar proxy records we obtained reconstruction of growth rates and precipitations in Bosnek karst region near Duhlata cave, Bulgaria for the last 50 000 years and for the last 6 400 years with averaged step of 41 years (157 points) for Iowa, near Cold Water cave, US.

4. Luminescence microzonality was used to reconstruct Galactic Cosmic Rays Flux (out of the Solar System) during the last 6 500 years with 20 yr resolution by subtracting of an inverted luminescent SA record from residual  $^{14}\text{C}$  record. Last result is a qualitative confirmation of recent views on origin of Cosmic Rays from superposition of Supernova explosions in our Galaxy.

5. NASA used a record of luminescence of a flowstone from Duhlata cave, Bulgaria to obtain a standard record of variations of Solar irradiance ("Solar constant") for the last 10 000 years by calibration of the luminescence record with satellite measurements.

6. Uplift of bedrock with the cave can be detected and precisely dated if speleothem luminescence is due to epithermal mineral forming waters in the older part of speleothem, but mixing of this waters with surface waters containing organic appear in younger parts of the speleothem.

Next meetings of the Commission on Physical Chemistry and Hydrogeology and its Working Group on Speleothem Records of Environmental Changes will be held during the Symposium on "Climatic Change - The Karst Record" in Bergen, Norway, August 1-4, 1996 and International Conference on "Scientific and Applied Methods for Discovering of New Caves" in Karlukovo, Bulgaria, August 8-11, 1996.

Intensive search for external funds for commission activities is in progress. Commission call for proposals for new International programs.

Yavor Yavorov Shopov

## **Commission on Volcanic Caves**

*8th symposium to be in Kenya.* As a result of the formal responses to the "Response Form" attached to Newsletter #6, it is clear that most of the vulcanospeleological world wishes the 8th International Symposium on Vulcanospeleology in 1998 to be in Kenya. (Good support for Giuseppe Licita's proposal came from France and Spain, however.) Symposium Chairman or Co-Chairman will be:

Hon. Jim Simons  
PO BOX 47363  
Nairobi, Kenya

The date has not been fixed. At the 7<sup>th</sup> Symposium, the Commission and its friends expressed a strong preference for the week of February 1998 during which European universities will be on holiday. I have asked Jim Simons to work with UIS President Paolo Forti in setting the exact dates. More details will be supplied as soon as possible. Persons with information on how to obtain "bucket shop" ("consolidator") fares to Nairobi are asked to send it to the Commission President as soon as possible.

*Possible Second vulcanospeleological conference of the Atlantic Islands.* Alfredo Lainez has determined that it is not practical to convene a 2<sup>nd</sup> Atlantic Islands conference in the Canary Islands in 1996. As Chairman of this Commission, I have expressed the hope that a similar conference will be possible at a later date.

Siggi Jónsson also had proposed such a conference in 1996, to be held in Iceland. No recent word has been received about this. If the Icelandic society proceeds with this proposal, it will be announced in this Newsletter as soon as possible.

William Halliday

## **Techniques and Equipment Commission**

Here are the specific plans for the Techniques and Equipment Commission for 1996 and 1997.

*Vertical Usage Survey.* In March or April 1996 we will send out a questionnaire to find out the types of SRT equipment used and the type of vertical pits done by cavers in their countries. It will be sent to Commission members, all national caving organizations, several selected publications in Europe and in other countries, and to cavers on the Cavers Digest on the Internet. (Caver Digest is in English, but it has many readers worldwide).

The questionnaire will be a simple one with only five or six questions that can be easily answered and sent back by mail, FAX, or Internet.

It might be appropriate to publish it in a forthcoming issue of the UIS News. This would help spread it to the widest possible audience.

Please let me know if I can send you a copy for use in the UIS News. We could also use a copy of your mailing list of member organizations and their publications. Please send us a copy when convenient.

*1996/1997 Issue of Techniques News.* Results from this survey will be published in the 1996/1997 issue of *Techniques News*, the occasional newsletter of this Commission. It will accompany a 1995 survey made among the U.S. and Canadian members of the NSS Vertical Section.

*Research for History of SRT.* For presentation on SRT History at the 1997 UIS Meeting and for publication in the 1997/1998 *Techniques News*, I am beginning to gather information. This will be presented in a paper at the Techniques and Equipment Session at the 1997 Meeting. I am also encouraging commission members to give a short verbal reports on the state of SRT in their countries at this Session. This material and their reports will also be published later in an issue of *Techniques News* and distributed to caving newsletters worldwide for their publication.

David McClurg

## **La Commission des grandes cavités**

### **Rapport d'activité**

1995 s'est inscrit dans la continuité des années précédentes, soit:

- mise à jour constante de la liste des cavités dépassant 1 000 m de dénivellation,
- mise à jour constante de la liste des cavités dépassant 40 000 m de développement,
- mise à jour des listes nationales "au coup par coup": il devient déraisonnable d'entretenir la mise à jour régulière de toutes ces listes (201 précisément).

La Commission prépare pour le prochain Congrès International de Spéléologie (1997) un Atlas des grandes cavités mondiales en roches non-calcaires, ce qui l'obligea, provisoirement, à délaisser les cavités en roche calcaire.

Enfin, en 1997, l'actuel président de la Commission, en exercice depuis 1973, souhaite et espère trouver un successeur. Considérant que, quoi qu'il advienne, il laissera une succession lourde à gérer, puisque la Commission travaille sans discontinuité depuis 1965, il conviendrait d'envisager un autre mode de fonctionnement: ce sera l'objet essentiel de la réunion de la Commission lors du Congrès de 1997.

Claude Chabert

## **La commission des speleo-secours**

### **Rapport d'activités pour l'année 1995**

- La Commission a poursuivi ses efforts d'informations et de contacts, tant avec les spéléologues qu'avec les organismes nationaux de secours et les fédérations qui désirent en créer.

- Elle exerce une action de prévention en répondant aux demandes de renseignements et en rédigeant des articles et exposés sur le sujet.

- Elle a eu la possibilité de diffuser de l'information via le bulletin du Corpo Nazionale de Soccorso Alpino e Speleologico qui met ses colonnes à sa disposition.

- Elle encourage les Spéléo-Secours nationaux à ouvrir leurs stages de formation aux spéléologues étrangers.

La Commission de Secours utilise au maximum les possibilités de rencontres que présentent les Congrès organisés par les fédérations nationales; en 1995, elle a notamment participé à des réunions en France et à Cuba; la participation de délégués étrangers lui permet de nouer des contacts et de mieux connaître leur organisation.

Dans le cadre du prochain Congrès UIS, d'excellents contacts sont entretenus avec le Spéléo-Secours Suisse pour la mise sur pied d'une "*Journée du Sauvetage souterrain*" et avec le Spéléo-Secours Français qui organisera après le congrès un "*Camp International de Formation et de Rencontre sur le Secours*".

Une excellente collaboration existe avec la Commission Enseignements UIS et le Président actuel de la Commission Plongée est également membre du Bureau Secours.

Si l'éloignement des membres du Bureau venant de 8 pays différents handicape la tenue des réunions, elle est enrichissante pour la diffusion de l'idée Spéléo-Secours que chaque membre diffuse autour de lui et lors de ses déplacements à des congrès ou des expéditions.

La Commission est toutefois freinée dans ses activités par une absence totale de subventionnement: ses réalisations se font sans la moindre aide monétaire, la présidence et les membres du Bureau de la Commission doivent supporter tous les frais (timbres, fax, téléphone et même le coût des déplacements vers les Congrès et réunions).

#### *Projets et objectifs pour 1996/1997*

1) Poursuivre les activités ci-dessous annoncées, soit:

- aider à la création et au développement du secours dans le monde,
- rétablir les contacts perdus avec différents pays,
- tenir à jour un listing des responsables du secours dans tous les pays avec leurs spécificités (médecins, para-médicaux, artificiers, plongeurs, etc.),
- promouvoir la prévention,
- établir un maximum de contacts relatifs aux secours avec les plongeurs, médecins et spéléos secouristes,
- intensifier les relations avec les Commissions Enseignement et Plongée de l'UIS et avec les Spéléo-Secours et Commissions Médicales nationaux.

2) Apporter son soutien aux organisateurs suisses du prochain Congrès de l'UIS dans la mise sur pied d'une "Journée du Sauvage Souterrain" et au Spéléo-Secours Français dans l'organisation d'un "Camp de formation et de rencontres sur le secours" qui suivra immédiatement le Congrès de l'UIS.

3) Participer à des Stages de Formation et des Séminaires de Spéléo-Secours (projets actuels: Aguadilla - Puerto-Rico 30/3 - 7/4/96 et Jaca - Espagne 1-3/11/96).

4) Rechercher un pays organisateur pour la prochaine Rencontre Internationale de Secours.

5) Poursuivre la recherche de subventions.

*Appel:*

- La Commission remercie les Fédérations qui soutiennent l'action de la Commission en faisant de la formation ou en mettant leurs revues à notre disposition. Elle souhaite toutefois que davantage de pays ouvrent leur stage secours aux spéléologues étrangers (comme c'est le cas notamment en France, Espagne, Italie, Bulgarie, Puerto-Rico).

- Par ailleurs, elle demande à toutes les Fédérations spéléologiques et aux Spéléo-Secours de lui faire connaître leurs activités, nouvelles techniques et matériel de sauvetage.

- Enfin, suite aux changements géo-politiques intervenus ces dernières années, de nombreux contacts ont été rompus.

Aussi la Commission demande-t-elle instamment aux fédérations concernées (entre autres la République Tchèque, la Slovaquie, la Pologne et les nouveaux pays de l'ex-Yougoslavie et de l'ex-Union Soviétique) de reprendre contact avec elle.

De même, elle demande aux Fédérations ne possédant pas encore d'organisme de Spéléo-Secours d'établir un contact avec elle.

***Composition du Bureau de la Commission:***

## **International Working Group Glacier Caves and Karst in Polar Regions**

Main outputs, projects and view of future:

### *Spain*

- A.Eraso: Application of the Prediction Method of underground drainage main directions:
- June-July 94: Expedition "Urales 94" with scientists from Russia and Ukraine
  - Publication of the book: "*Cuevas en hielo y ríos bajo los glaciares*", written together with M.Pulina, and edited by McGraw-Hill (this book is to be translated to English)
  - Feb.95: Participation to the International Glaciological Expedition "Hielo Patagónico 95" with scientists from Italia and Argentina
  - 95-96: restructuration of the INTAS Glaciological Project with incorporation of scientists from Italy, Kyrgyzstan and Russia (expecting qualification)
  - Summer 96: Organization and participation to the expedition "Islandia 96"
  - September 1-7, 1996: Participation to our 4th Symposium in Salzburg

### *Russia*

M.Moskalevsky:

- Spring 94: Franz Josef Land (FJL): Airborne radio-echo sounding
- Jan. 95: Antarctica, South Schetland, King George ice ca. Mass balance measurements and ground radio-echo sounding
- INTAS Glaciological Project (expecting qualification)
- Spring 96: FJL. Deep ice core drilling on Graham Bell ice cap

### *Russia*

B.Mavlyudov:

- 94-95: Several international expeditions to study the Inilchek Glacier, Tian Shan (Kyrgyzstan)
- INTAS Glaciological Project (expecting qualification)

### *Italy*

G.Badino:

- 1994: Inilchek Glacier, Tian Shan (Kyrgyzstan)
- Expedition "Hunza 94" to the Karakorum (Batura Glaciers)
- INTAS Glaciological Project (expecting qualification)
- Feb. 95: Expedition "Hielo Patagónico 95" (Argentina)

### *Czech Republic*

J.Rehak:

- Summer 93: 2nd polar expedition to Spitzbergen. Investigations on Werenskiold and Torell glaciers
- Summer 96: 3rd polar expedition to Spitzbergen. Investigations on Werenskiold, Torell, Hans and Horn glaciers

### *Poland*

M.Pulina, W.E.Krawczyk, J.Jania:

- Investigations on different glaciers in Spitzbergen
- Results of the investigations made on glacier caves have been used to write part of the book "*Cuevas en hielo y ríos bajo los glaciares*" (author: A.Eraso and M.Pulina) published by McGraw-Hill in 1994

### *Austria*

H.Slupetzky:

- Investigations on cryo-karst phenomena on glaciers in the central Hohe Tauern (eastern Alps)
- Organization of our 4th Symposium (Salzburg 1-7, 1996)

### *Canada*

J.Schroeder:

- Aug-Oct. 94: Co-operations Université du Québec a Montréal and University of Silesia: investigations of Hans Glacier (Svalbard, Spitzbergen)
- Video film "Svalbard, 78° latitude Nord" well competed in different international meetings (Trente, Italy and Columbus, Ohio)

*Switzerland*

R.Wenger:

- 1994: Exploration and observation of about 20 shafts (moulins) in the Gornergletscher glacier
- 1995: New explorations of the Mer de Glace glacier in collaboration with French glaciologists
- 1996-97: Open to explorations of other glaciers with glaciologists of any country. We offer our experience in topography and photography.

*France*

M.Griselin, L.Moreau, L.Reynaud, E.Perrot, etc...

1993-1994:

- Argentiere glacier: measurements of the velocity of the glacier through the "cavimeter" (L.Moreau's doctorate thesis/Institute of Alpine Geography of Grenoble).
- Greenland and the Mer de Glace: investigation and exploration of glacier moulins ("Inlandsis 93" and "Inlandsis 94" expeditions).
- Spitsbergen: hydro-glaciological expedition on the Loven East Glacier and realization of the "Loven Story" video film (26 minutes) on the hydrology of the Loven East glacier.
- Organization of the 3rd Symposium of the Commission (Chamonix, Nov. 1-6, 1994) and publication of the corresponding proceedings.

1995/96/97:

- "Inlandsis 95" to Greenland: exploration of moulis and investigation on the wall deformations with realization of a 16 mm-movie.
- Spitsbergen: new hydroglaciological/geochemistry investigations in the polar regions glaciers.
- Presentation of M.Griselin's film "Vie et Science en Arctique" at the CNRS "30 Years of French Scientific Investigations in Spitzbergen", Oct. 1995, in Paris.

Eraso Romero

**G.T.I.C.E.K.  
(Grupo de Trabajo International sobre Cuencas Experimentales en el Karst)**

1994/1995:

- Publications of the Proceedings corresponding to the 1st meeting of the group (Matanzas, Cuba, April 1992). Editors: H.J.Llanos, I.Antigüedad, I.Morell and A.Eraso.
- 2nd meeting of the group in Pinar del Río, Cuba (April 1994) with the participation of scientists from: Cuba, France, Israel, México, Republika Dominicana and Spain, and publication of the corresponding proceedings (Editors: A.Pulido-Bosch, J.R.Fagundo and J.E.Rodríguez-Rubio).

1996:

- III meeting of G.T.I.C.E.K. in Topes de Collantes, Sancti Spiritu, Cuba (Nov. 10-15, 1996). For more information, please contact:

## **Commission of Bibliography The Report for 1995**

*Editing activity:* The annual issue of the Speleological Abstracts SA/BBS/CTS No. 32 for 1993 was published in August 1994; it contains 244 pages and 4307 titles and abstracts. The annual issue of the Speleological Abstracts SA/BBS/CTS No. 33 for 1994 was published in August 1995; it contains 293 pages and 4932 titles and abstracts. Many thanks to all correspondents and contributors, mainly to Ray Mansfield, for their support and help.

*Other activities:* No international working session, but a lot of correspondence, and some internal meetings. Some of these meetings are devoted to aspects of informatics, e.g. a bundle of SA/BBS/CTS on CD-ROM as a relational database; the access to SA/BBS/CTS data through Internet; the legal aspects of the copyright. And last but not least the care for finance in order to ensure in the future the print of the SA/BBS/CTS annual issue.

*Plans for 1996-1997:* We work now on the next issue No. 34 for 1995, it will be published in the summer 1996. Subsequently we will begin the database for the issue No. 35 for 1996.

In August 1997 we plan a working session of the Commission of Bibliography during the 12th International Congress of Speleology at La Chaux-de-Fonds, Switzerland.

Dr. Reno Bernasconi

## **Advisory Committee**

The Secretary General of the UIS obtained an official letter from Dr. Friedrich Oedl, Salzburg, Austria, who represented the Committee for a very long time, that after the 12<sup>th</sup> International Congress of Spelology he will not be able to serve as the President of the Advisory Committee. Many thanks Friedrich!

Nevertheless, there appeared the problem of the constitution of the new Advisory Committee which represents an important body within the UIS structure. The UIS Bureau welcome all proposals for the new personnel of the Committee as well as the nominations for the Committee President. He should be lawyer preferably.

## **From member countries**

### **ALBANIA**

The payment for caving in Albania resulted from governmental law and the payment is explained by the safety situation in Albania. There is the positive change as expeditions up to 10 persons and less than 15 days of stay are paying totally 50 USD, expeditions either stronger than 10 persons or staying longer than 15 days are paying 100 USD per stay.

### **ITALY**

The Italian Speleological Society made an agreement with Milano Assicurazioni spa on the insurance of cavers. All foreign cavers with planned activities in Italian caves can use the insurance. The text (Convenzione Assicunsurance tra

SSI et Milano Assicurazioni spa) and necessary information is available in the Istituto Italiano di Speleologia, Via Zamboni 67, 40127 Bologna, Italy.

### **Call for exchange**

I would also be interested in exchanging ideas, pictures and information with speleology enthusiastic like myself. Could you please include my name and address in your news or notice board?

Many thanks in advance.

Alexandre Lopes Camargo  
Rua 2 de outubro, 270  
São Bernardo do Campo  
São Paulo, Brasil  
CEP 09780-120

### **Caving in Kyrgyzstan**

The Union of Kyrgyzstan speleologists will organize the SPELEO-FORUM "Kyrgyzstan-96" in the honour of the 30<sup>th</sup> anniversary of speleology in the Republic. The activities of the SPELEO-FORUM will be held in karst region of the Osh Hills near the city of Osh in the South of the Republic on September 4 to 10, 1996.

The participation in the SPELEO-FORUM can serve as an opportunity for new contacts, for the growth of new ideas and for new projects as well as to become acquainted with rare natural complexes of Kyrgyzstan, its people, customs, history and today's life of the historic place of the Central Asia.

#### **The program and terms of SPELEO-FORUM "Kyrgyzstan-96"**

September, 4

The arrival and registration. Location in the Camp.

September, 5

The arrival and registration. The opening of the SPELEO-FORUM. The presentation of the program. Invitation banquet.

September, 6

The observation tour to the region of the "Osh hills" (the Osh City, the ascent on the Suleiman Mount, market, historical and cultural monuments, caves and others). The organization of Round Table on the "Opportunities of the Development of Ecology in Speleology".

September, 7

The visit of the Chill-Ustun Cave, the SPELEO Club and the Museum.

September, 8-9

The open competitions of speleologists-climbers. The excursion to the Tuya-Muyun karst (30 km) - the visit of Dangi Gorge and Big Barite and Surprise Caves. Round Table "The common problems in speleology".

September, 10

Official ceremony of the SPELEO-FORUM and the opening of the Festival (videostore, degustation of national dishes of Central Asia's people, the fair of souvenirs and many others surprises). The Farewell Banquet will finish the SPELEO-FORUM.

The participants of SPELEO-FORUM are served by transport, seats in campgrounds, group equipments and

apartments, full board. The interpreter's services are offered, the first medicine aid and excursions' services are also suggested. The reservation of return tickets in advance are not in committee's possibilities. The cost of the main program in the SPELEO-FORUM for one person is 240 USD.

After the main program of the SPELEO-FORUM following possibilities can be offered:

1. 4-hours flight by AN-2 aircraft to the Pamir Mts. with the flight over the highest summits of the Lenin's and Communist's Peaks (the price will be stated at the place).

2. The rest in the mountain camp of Akh-Tash on the northern slopes of the Alay Mountains. The ascents on 5-thousand's mount, trekking to the glaciers, parties in bars, saunas, comfortable rooms, the complex passion of meals, ... The duration of 5-7 days is supposed. The cost for one person is 28 USD per day.

3. SPELEO-trekking "Along the caves of Southern Ferghana" in the duration of 5-7 days. The transport, campings, special equipment, food, interpreters and light are served. The cost for one person is 38 USD per day.

4. The mountain trekking "The Exotics of the Alay Mountains" in the duration of 5-10 days. The transport, campings, food, interpreters are served. The cost for one person is 43 USD per day.

**INTERNATIONAL JOURNAL OF SPELEOLOGY**

**NEW SUBSCRIPTION OF THE INTERNATIONAL  
JOURNAL OF SPELEOLOGY ARE VITAL:  
PLEASE DO YOUR BEST TO GET MANY MORE!**

Address: Prof. Ezio Burri, Editor, Department of Environmental Sciences, University of L'Aquila, Via Vetoio-Loc. Coppito, I-67100 L'Aquila, Italy, t.: 0039-862-433222, f.: 0039-862-433205

**ANNUAL CONTRIBUTIONS CHANGED**

The UIS General Assembly decided to rise annual contributions of the UIS member countries. Beginning with 1994, the annual contributions will be as follows:

Category A            300 USD

Category B            200 USD

Category C            50 USD

Each UIS member country has the free choice of the category in accordance with its own financial possibilities and with the number of speleologists or speleological societies/ associations/ federations/ clubs/ institutions

The UIS Bureau is authorized to reduce or to remit the contributions, if the UIS member country makes a respectively written demand. If the UIS Bureau requires, the UIS member country has to give reasons for the difficulties of a payment.

The authorization of the UIS Bureau to reduce or remit the contributions confirms that the impossibility of a payment by actual political problems of difficulties will not be an argument to exclude any member country from the international collaboration within the structure of the UIS.

**Older numbers of the UIS-Bulletin**

The volume 38 of the UIS-Bulletin as well as the most earlier volumes of the UIS-Bulletin are available on request by the UIS Past-President Prof. Dr. Mag Hubert Trimmel (Draschestrasse 77, A-1230 Wien, Austria). The volumes 39 to 41 are available on request by the UIS Secretary General Dr. Pavel Bosák.

Note: I - International event, R - Regional event, N - National event

#### **IMPORTANT NOTE**

to all organizers of the speleological events. The use of the name and/or logo of the International Speleological Union (UIS) in the title or subtitle of the event brings some duties:

(1) the use of the name and/or logo have to be confirmed by some of the UIS Bureau members and

(2) the use of the name and/or logo is against the payment. According to the motion of the Assembly General of the 9th International Congress of Speleology, Bowling Green, USA, July 22, 1981, point 4, the payment per capita in the UIS events are set **at 5% of the event registration fee, with a minimum of 3 USD** (see UIS Bull., 22, 1/2, p. 28).
